

## 1.- Levantar Apache

## 2.-http://localhost:8080

## Welcome to XAMPP for Windows 8.0.0

You have successfully installed XAMPP on this system! Now you can start using Apache, MariaDB, PHP and other components. You can find more info in the FAQs section or check the HOW-TO Guides for getting started with PHP applications.

XAMPP is meant only for development purposes. It has certain configuration settings that make it easy to develop locally but that are insecure if you want to have your installation accessible to others. If you want have your XAMPP accessible from the internet, make sure you understand the implications and you checked the FAQs to learn how to protect your site. Alternatively you can use WAMP, MAMP or LAMP which are similar packages which are more suitable for production.

Start the XAMPP Control Panel to check the server status.

## Community

XAMPP has been around for more than 10 years – there is a huge community behind it. You can get involved by joining our Forums, adding yourself to the Mailing List, and liking us on Facebook, following our exploits on Twitter, or adding us to your Google+ circles.

Contribute to XAMPP translation at [translate.apachefriends.org](https://www.transifex.com/apache-friends/xampp/)

## Hello.php

```
<!DOCTYPE html>
<html>
  <head>
    <title>Hola Mundo PHP</title>
  </head>
  <body style="background-color:#33FFD7;">
    <center>
      <h1>
    <?php
    print("Hola a todos");
    echo "<br>";
    print("Bienvenidos al mundo PHP");
    echo "<br>";
    printf("Soy Hackiman");
    ?>
  </h1>
  
    </center>
  </body>
</html>
```
